

HOW TO LEAD ACTIVE LEARNING IN SCHOOLS

CEU COURSE OVERVIEW

Active learning is an instructional approach in which students take an active and fully engaged role in their education, rather than sitting passively and absorbing information. Active learning is more effective than traditional instruction, and it also helps build critical 21st century skills that employers desire. For active learning to be successful, many important elements must be in place. This presentation aims to help K-12 leaders provide these elements.

LEARNING OBJECTIVES

Learning Objective 1: Defining active learning

- What is active learning?
- Four benefits of active learning
- Five examples of active learning
- Three key requirements for active learning to be successful

Learning Objective 2: Why classroom design matters

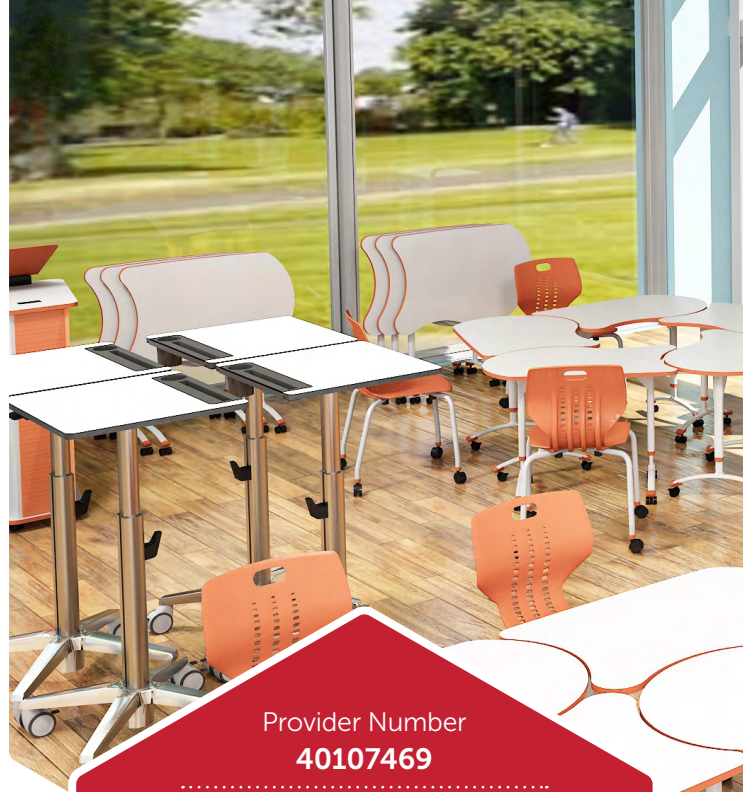

- How the design of a learning space shapes both teacher and student behavior
- How different classroom arrangements are conducive to different learning outcomes
- Why having flexible and modular furniture is critical for supporting active learning

Learning Objective 3: Getting started

- Setting a vision and goals
- Building teacher capacity
- Measuring success

Learning Objective 4: Managing change

- Clarifying the purpose
- Providing direction
- Applying both pressure and support
